

My Score saddle chair: optimum ease of operation

- 1** The backsupport is anatomically shaped, providing good support for your lower back without limiting shoulder freedom.
- 2** Ergonomically shaped saddle seat tilts the pelvis to improve spinal posture.
- 3** To adjust the seat angle of your saddle seat correctly, pull the lever up and simultaneously lean slightly forward. The saddle seat will tilt. Make sure that you use a tilt setting that does not make you slouch.

- 4** To adjust your saddle seat at the correct height, pull up the gaslift lever. Your saddle seat has the correct height if your feet rest on the ground and your knees are slightly bent.
- 5** Can be provided with a Score 'Balance' mechanism which allows small movements of the pelvis, allowing the user to adapt his/her posture. This encourages dynamic sitting which helps to improve core stability.

- 6** Standard provided with a Ø 54 cm aluminium base and large swivel castors for optimal mobility.

Saddle chairs Jumper and Amazone

Saddle chairs

Balance Lumbar support

Find your relax moment during active seating? Choose a Score Balance Amazone/Jumper saddle chair with lumbar support.

The anatomically shaped seat automatically, tilts your pelvis back, so you adapt a natural and relaxed position.

The Balance mechanism lets you in a way "balancing" to get an active sitting position. This stimulates your blood circulation. Moreover, you train your back and abdominal muscles.

An ergonomic workout while sitting. The moving lumbar support provides light support for your lower back for a moment of relaxation during your daily work.

About Score

Existing for almost 40 years, Score is a family owned Dutch company specialised in development and manufacturing of ergonomic chairs and accessories and is one of the leading players in Europe.

Score's saddle chairs are widely known as the most comfortable ergonomic saddle chairs available. They have become the standard in European countries and are being distributed worldwide.

From the drawing board to production and extensive field testing, the complete development process takes place in-house.

In order to guarantee high standards of quality, Score products are exclusively distributed via carefully selected dealers.

Perfect fit; Available in two sizes

For tailor-made solutions at your workplace; Score's saddle chairs come in two different seat shapes: the Jumper for a wider seat and the Amazone for a narrower seat.

Maximum hygiene

For workplaces where hygiene is very important, the anti-bacterial seamless upholstery provides a solution. The lack of seams prevents the accumulation of dirt.

Back support

Our saddle chair can be provided with an ergonomically shaped back for extra support. The back support has a compact design to ensure that freedom of movement is not impaired. The back support is adjustable in both its height and angle.

Arm support

The saddle chair with back support is available with ergonomically shaped armrests. These offer extra support to reduce neck and shoulder complaints. This model, the Barrage, can be delivered with both Jumper and Amazone seat shapes.

Jolly

Saddle chair with the seat in the form of a bicycle saddle at a fixed sitting angle. Excellent mobile sit-stand stool, particularly suitable for working areas with limited leg room.

Balance healthy active sitting

With the balancing seat the pelvis and the spinal column stay in balance, and pressure points such as the inside of the thighs and the pubic bone are relieved of pressure when changing posture.

The movement of the seat also prevents static sitting and stimulates the muscles in the lower back, improving muscle tone and strength, reducing back pain and sitting fatigue.

The level of movement of the balancing mechanism can be adjusted entirely to suit the user's preference.

360° Support

360° rotatable armrest/backrest. Easy to move out of the way. For supporting one or both arms.

Handsfree height adjustment

The saddle chairs can be provided with foot controlled height adjustment. Very useful if you would like both hands to be free for your work and/or should be kept sterile.

Upholstery:
Available in Stamskin® TOP PUxx no. 1, Trevira (fabric) and black leatherette.

Stamskin

bright green K81	bright red K87	bright orange K93	turquoise K184	bright blue K80	dark blue K89	anthracite K85	grey K195	black K05

Bicolor Stamskin

Amazone Stainless Steel

For working environments where hygiene requirements are strict, such as in the food industry and in hospitals. Stainless steel resists the wear that frequent cleaning with chemical disinfectants or water causes. Thanks to its high base, the space underneath the chair is easy to clean. The saddle seat is created from PU (polyurethane) and is fire-resistant, CFC-free and resistant to many aggressive chemicals.

Amazone/Jumper ESD or Cleanroom

An ESD safe saddle chair features conductive components and an upholstery that can be fitted with a resistance of 1Mohm for a controlled discharge. Score ESD products meet the standard IEC 61340-5-1. The cleanroom version received an outstanding Fraunhofer Cleanroom ISO class 3 certificate.

Amazone PU (polyurethane)

Polyurethane is suitable for heavy duty industrial working environments. It is easily cleanable and resistant to various chemical substances. Also available with a back support..
